

CAMS User's Conference - June 11, 2002

Recognition of Census' End-Users

It took an incredible effort to establish the CAMS Core Financial System as the Census Bureau's financial system of record by October 1996. As much of a milestone as that was, Census management can testify that implementation was just the beginning. We would like to recognize the staff that work on the CAMS Help Desk, the CAMS Training Staff, the Navigators Menu team, the Commerce Purchase Card System, the NFC Labor and Employee Interface, the Census CAMS User Group, the Census-Specific Reports Team, and the AP Standard Interface and the Summary Level Transfer module. The success of CAMS at the Census Bureau is directly related to their hard work and dedication. Today we would like to honor those Census employees who have made a significant contribution and continue to do so as the CFS changes and feeder systems are implemented and enhanced.
